Professional Summary

Senior cloud and infrastructure engineer with 9+ years across Microsoft cloud operations, SaaS reliability, incident response, automation, regulated infrastructure support and security-focused operations. Strong background in Microsoft 365, Azure, Entra ID, Intune, production support, platform troubleshooting, PowerShell and Python automation, documentation and cross-functional escalation. Comfortable working across infrastructure, support, security and engineering teams where reliability, clear evidence and pragmatic delivery matter.

Core Skills

- Cloud and infrastructure: Azure administration, Microsoft 365, Entra ID, Exchange Online, SharePoint Online, Teams, Intune, endpoint operations and service health
- Platform operations: SaaS reliability, production support, incident response, service ownership, engineering handoff and release-support troubleshooting
- Automation and tooling: PowerShell, Python, API checks, repeatable operational tooling, runbooks and process improvement
- Containers and deployment support: Kubernetes-aware troubleshooting, containerised service support, deployment investigation and log-led diagnosis
- Observability and diagnostics: telemetry-driven investigation, logs, service-health analysis, root-cause analysis and post-incident improvement
- Security and compliance: Conditional Access, MFA, least privilege, endpoint compliance, privileged-access workflows and regulated-environment discipline
- Collaboration: stakeholder communication, mentoring, documentation, escalation hygiene and practical trade-off management

Professional Experience

Microsoft 365 and Cloud Engineer (Level 3)

- Act as senior escalation engineer across Microsoft 365, identity, endpoint and cloud operations, supporting enterprise collaboration services and secure access patterns.
- Administer and troubleshoot Exchange Online, SharePoint Online, OneDrive, Teams, Entra ID and Intune, balancing user productivity with security, governance and service reliability.
- Build and maintain PowerShell automation and operational runbooks for tenant administration, identity lifecycle tasks, endpoint baselines and recurring service checks.
- Investigate authentication, endpoint and service-health issues using logs and telemetry, driving root-cause analysis, remediation and post-incident improvements.
- Work with security, infrastructure and support teams to harden Conditional Access, MFA, compliance policies and privileged-access workflows.

Senior Technical Analyst

- Supported production SaaS and collaboration environments, troubleshooting identity, access, availability and configuration issues across distributed cloud services.
- Partnered with engineering teams on incident response, release troubleshooting, security hardening and service reliability improvements for global customers.
- Worked with containerised and cloud-hosted services, using logs, monitoring and structured escalation to resolve complex production issues.
- Produced technical documentation and mentored colleagues on secure troubleshooting, escalation hygiene and repeatable operational practices.

Technical Lead, Cloud Engineering

- Led cloud support engineers handling Azure and Microsoft 365 escalations for enterprise customers, with focus on identity, access, tenant configuration and service health.
- Drove root-cause analysis for complex Microsoft cloud incidents and converted repeated fixes into runbooks, coaching and process improvements.
- Supported Azure administration, governance and security-aligned operating practices across cloud and collaboration workloads.

Cloud Engineer

- Resolved Azure and Microsoft 365 technical issues across identity, administration, endpoint and collaboration workloads for enterprise customers.
- Supported secure configuration of Exchange Online, SharePoint Online, Teams and Entra ID, escalating high-risk issues through structured support processes.

IT Support Operations Engineer

- Supported infrastructure and end-user technology in a regulated banking environment, including Windows administration, access control, endpoint support and operational security.
- Maintained documentation and service processes for incident handling, user access, business applications and infrastructure support.

Certifications

ITIL 4 Foundation (valid to Apr 2028)

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure AI Fundamentals

Education

Bachelor of Science in Computer Science - Olabisi Onabanjo University
